Contact our projects team

Yorkshire Building Society Group (YBSG) is one of the UK's biggest mortgage and savings providers. It is a forward-thinking mutual organisation with customers at its heart.

The business places increasing importance on agile working and sought to establish an innovation centre at its office in Bradford to allow teams – as well as community groups- the space and tools to find creative solutions to problems.

The client engagement programme

Contact was made with YBSG regarding an ambitious project for an overall innovation centre.

- Review Meeting: General Client/User requirements gathering.
- New site review, of prospective design of the new space. 3D Virtual reality of space was provided.
- Client equipment review: interactive touch screens and whiteboarding, Skype for business implementation.
- Project design: Statement of work, Infrastructure drawings, System schematic drawings.
- Client Approval: Scope of work and commercials.

The Results

Due to the unique request and ambitious nature of the brand-new space for YBSG the technology had to be specified correctly to match both expectations and user adoption.

Microsoft Surface Hubs (MS Hubs) fitted all the requirements requested as well as integrated with additional technology implementations by YBSG. Two 55" Surface Hubs on Rolling stands were installed in the space to give maximum flexibility to the space and to create technology resources that are not only available to the Innovation centre but can be shared and used by the general office.
